

The key to Quebec real estate.

Sell without commission · Buy together · Invest from \$100 — one verified platform.

Live demo: ssocciarelli.github.io/cle-demo

THE PROBLEM

Owning property in Quebec has three locked doors.

SELLING

\$24,600

typical ~5% commission on a median single-family sale — an est. \$2.1B/yr pool taken off Quebec homeowners' equity

BUYING

\$650,000

Montréal single-family median, July 2026 — +7% in a year, increasingly out of reach for a single household, with no tooling to buy together safely

INVESTING

Locked out

US retail invests billions in real estate (Fundrise US\$3.3B AUM); Canada's consumer channel moved ~\$5M/yr for lack of a trusted front-end

THE SOLUTION

Five proven engines, one verified network.

1 · PROPRIO-DIRECT

Sell without commission — fixed \$1,199–\$1,999 packages, AI pricing, notary on file (the DuProprio model, rebuilt)

2 · MARKETPLACE

\$450K condos to \$40M sites, plus confidential business-for-sale listings under e-signed NDA

3 · BUY GROUPS

Purchase together — pooled down payments, double-majority votes (C.c.Q. art. 1026), notarized agreements

4 · CAPITAL PLATFORM

Invest from \$100 — revenue-share LP units under NI 45-110, then OM & accredited raises via our own dealer

5 · PROFESSIONAL NETWORK

Licence-verified profiles (OACIQ, CNQ, RBQ...), subscriptions, discreet capped advertising

CLÉ IA

AI throughout — natural-language search, instant property assessments, seller pricing guidance (Claude API in production)

THE PRODUCT — BUILT, NOT PROMISED

A complete working prototype, live today.

- Every flow works end-to-end: listings with real photo upload, offers into secure deal rooms, NDA-gated business files, buy-group votes, KYC-gated subscriptions with the 48-hour withdrawal right
- Trilingual (FR / EN / IT) · mobile-clean · guided 2-minute tour for first-time visitors
- Compliance modeled in-product: investor caps, all-or-nothing escrow states, risk acknowledgements, licence-verification ladder

THE MARKET

A \$47B market with a structural pricing anomaly.

QUEBEC 2025

97,214

residential sales — third-best
year on record (+8%)

TRANSACTION VALUE

≈\$47B

Montréal CMA = 48% of
provincial volume

FSBO SHARE (EST.)

~15–20%

highest in Canada, sources
diverge (up to 25%) —
commission skepticism is already
culture here

FEE-REVENUE TAM (QC)

≈\$120M/yr

vs. an est. \$2.1B/yr of
commissions displaced; SAM
today ≈\$55M

Affordability is forcing collective ownership — Ourboro has co-bought 250+ homes (>\$200M) with Scotiabank and CMHC behind it. The rails for everyone else don't exist yet.

WHY NOW

Four doors opened at once.

- **The incumbent stalled.** DuProprio: \$45.6M revenue and NPS 61 (FY2017), then three ownership changes at a flat \$50–60M — a one-product ceiling, not a small market
- **Co-ownership went institutional.** Scotiabank, CMHC and Pacaso's US\$72.5M round all bet on shared ownership in the last 36 months
- **The regulatory rails exist.** Harmonized crowdfunding (2021), OM exemption, EMD path — mapped and modeled in our product already
- **Québec subsidizes the build.** CDAEIA credits (20–30% of dev salaries), Impulsion PME matching, \$200M Fonds Impulsion

BUSINESS MODEL

Five streams, each priced against a proven benchmark.

STREAM	PRICING	BENCHMARK	FY31
Owner-direct packages	\$1,199–\$1,999 flat	Incumbent's validated 2025 ladder	\$18.0M
Subscriptions	Pro \$39/mo · Firm \$249/mo	LinkedIn Premium, verticalized	\$2.5M
Capital platform	5% + 0.75% trail (own EMD)	Under portal/EMD norms of 6–8%	\$2.5M
Buy-group fees	\$2,500 flat package	Non-contingent software rails vs. Ourboro's equity take	\$0.8M
Discreet advertising	Native, 1-in-6 cap	Enforced in code, not policy PDFs	\$0.6M

Seller contribution $\approx$ \$1,160/package after fulfillment vs. $\sim$ \$220 CAC target — **revenue on day one, no payback lag.**

GO-TO-MARKET

Revenue first. Licence second. No step depends on the next.

PHASE 1 · MONTHS 0–6

Launch

Network + Proprio-direct + marketplace + active buy-groups. **Zero securities exposure.**
Revenue from day one

PHASE 2 · MONTHS 6–18

Partner capital

Revenue-share campaigns $\leq$ \$1.5M through a registered funding portal (white-label). Clé earns tech & marketing fees

PHASE 3 · MONTHS 15–30

Own dealer

Clé Capital inc. registered as EMD → OM offerings, accredited rounds, \$10K crowdfunding tier

24-month milestones: 1,200 paid listings · 700 Pro subscribers · 34 buy-groups · \$2M campaign GMV · EMD filed · $\approx$ \$2.4M year-2 revenue.

FINANCIALS — ILLUSTRATIVE, FULFILLMENT COSTS INCLUDED

\$24.5M revenue and 19% EBITDA in year 5.

BREAKEVEN

FY30

EBITDA +\$1.0M (7%), then +\$4.7M (19%) in FY31

CUMULATIVE BURN

≈\$3.2M

covered by the \$3.5M seed with buffer

RESILIENCE

5 engines

a 12-month capital-platform delay moves breakeven only ~2 quarters — listings + subscriptions carry the company

COMPETITION

Everyone runs one engine. We run the network.

PLAYER	ONE ENGINE	THE GAP WE EXPLOIT
DuProprio (Desjardins)	FSBO packages	No network, no capital layer; five years without a second act under bank ownership
Centris / brokers	~5% commissions	The est. \$2.1B anomaly itself — brokers join Clé as verified pros instead
addy · Willow	Fractional investing	No audience, trust deficits (\$100K BCSC penalty); our marketplace supplies both
Ourboro · Key	Co-ownership funds	They invest their capital; we're the rails for anyone's group
FrontFundr	Funding portal	Horizontal, no real-estate depth or property marketplace

Purplebricks pre-empted: UK fixed-fee died of agent payroll + global burn. Quebec has a 25-year FSBO culture, and our packages carry no agent payroll.

THE MOAT

Compliance as architecture — hard to copy, harder to retrofit.

- **Verification ladder** wired to professional registries (OACIQ, CNQ, OIQ, RBQ...) — trust as a data asset
- **Legal-lane router**: every raise is born in the right exemption (45-110 / OM / accredited), with caps, escrow states and withdrawal timers enforced in code
- **Quebec-native**: Civil-Code governance for buy groups, French-first product, notary integrations — structural friction for outside entrants
- **The flywheel compounds**: every seller recruits professionals; every professional feeds deal flow; every deal seeds investors

REGULATORY PATH

Regulated by design — status, stack, risks, mitigants.

STATUS TODAY

Zero regulated activity. No OACIQ licence, no AMF registration — and none is required: every regulated function is a labeled simulation on fictional data. No client funds ever touch Clé accounts.

THE REGULATED STACK

FSBO assistance outside the Brokerage Act (fixed non-contingent fees — the DuProprio model confirmed in the 2018 reform) · broker-ad rules built into listing templates · capital via **partner exempt-market dealer, then own EMD** · mortgage tools educational-only (AMF line) · FINTRAC-grade identity partner · Law 25 privacy program.

TOP THREE RISKS

① Fee recharacterization as brokerage → only fixed, non-contingent fees, no negotiation, no broker-like titles. ② Securities perimeter on group buying → member decision rights (C.c.Q. indivision), no yield marketing, counsel structuring pre-launch. ③ EMD timeline slippage → partner-dealer phase first; CSA sandbox and AMF fintech intake as bridges.

SEQUENCED MITIGANTS

Securities + brokerage counsel retained at close → regulated partner before the first real dollar (never "launch then register" — the addy lesson) → own EMD filing in months 15–30, CCO hire and \$50K regulatory capital budgeted inside the 18% compliance envelope.

Feature-by-feature dossier, verified against primary sources:
ssocciarelli.github.io/cle-portfolio/compliance.html

TEAM

[To be completed by the founder]

FOUNDER & CEO

[Name]

[Two lines of directly relevant proof: real-estate operating history, ventures, transactions, market standing]

PRODUCT / CTO

[Name]

[Track record — the working prototype sets the bar; or: recruiting, funded by this round]

SECURITIES COUNSEL

[Firm]

[Named Quebec securities practice anchoring the 45-110 / OM / EMD path]

PARTNER NOTARY

[Office]

[Named notarial office for closings, conventions and trust accounts]

Stated gaps: CCO hired ahead of the EMD filing; Head of Growth (Québec) is the first post-close hire.

THE ASK

\$3.5M seed — 24 months through launch to the capital phase.

PRODUCT & ENGINEERING

36%

\$1.26M — prototype → platform, FR/EN

GROWTH (MONTRÉAL)

28%

\$0.98M — the seller beachhead

COMPLIANCE & EMD

18%

\$0.63M — counsel, portal partner, EMD build

OPS & RESERVE

18%

\$0.63M

- Milestones: 1,200 listings · 700 Pro subs · 34 buy-groups · \$2M GMV · EMD filed · ≈\$2.4M year-2 revenue
- Québec leverage on top: CRIC R&D credits from year one, CDAE-IA after the six-employee gate, Fonds Impulsion co-investment ≈ 4–6 extra months of runway
